GBM: 8 seeds, 5,000 paths/seed; N=64..1024
Strong slopes repeat across independent seeds
Terminal L1 error [currency]
10^{0}
10^{-1}
10^{-2}
EM: p=0.500, seed SD=0.008
slope 0.5 guide
Milstein: p=0.993, seed SD=0.003
slope 1 guide
10^{-3}
10^{-2}
Time step h [years]
Controlled weak slopes both remain near one
Absolute mean bias [currency]
10^{-3}
EM: p=0.999, seed SD=0.006
slope 1 guide
Milstein: p=1.000, seed SD=0.003
slope 1 guide
10^{-3}
10^{-2}
Time step h [years]
Shading: empirical central 95% spread of independent-run fitted curves, not a guaranteed confidence band.
